

## **Thorvin for Plants Foliar 0.5-0-17 – Specifications**

## **GUARANTEED ANALYSIS 1-0-18**

Total Nitrogen (N)	0.5%
Available Phosphate (P <sub>2</sub> O <sub>5</sub> )	0%
Soluble Potash (K <sub>2</sub> O)	17%

PRODUCT SPECIFICATIONS	
Dilution Rate	10 ounces in 1 gallon of water
Color	Black
Odor	Slight
Particle Size	Granule
Density	41 to 42 pounds/cubic feet
Solubility	100%
рН	9 to 11, dissolved in neutral water
Moisture Content	2 to 4%
Sodium in Process	None

## Directions:

Reconstitute Thorvin for Plants Foliar by dissolving ten ounces into one gallon of water. Mix well, and then further dilute by adding enough water to cover an acre. For smaller applications, mix ¼ teaspoon of Thorvin for Plants Foliar with one gallon of water, which covers 250 to 300 square feet.

Spray plants or water in every two weeks, or at least three times during the growing season. Tip: For best results, spray as a fine mist covering all foliage, including underside of leaves in early morning or evening.

Ingredients: Derived from dehydrated Icelandic Geothermal kelp extract (Ascophyllum nodosum).
